

ADVANTAGE

- High endurance**
- Wide rating range**
- Numerous versions**
- High level of safety and reliability**
- Easy to integrate into existing systems**

PRODUCT FEATURES

- Extremely energy-efficient solutions
- Mono- or bi-directional mode, all common frequencies
- Customized switching concepts
- Experience in implementation of customized designs
- Complete mechatronic systems

EXAMPLE OF APPLICATION

- Vacuum cleaner
- Venetian blinds
- Roller shutters
- Doors

Frequency range	868 MHz
Supply voltage	3 V-Lithium round cell CR 1632
Transmission power	-14,5 Dbm (0.035 mW)
Operating temperature range	-5 °C – 50 °C
Storage temperature range	-30 °C – 70 °C
Power consumption	Approx. 15 mA in active mode, approx. 10 µA in sleep mode or 0 when switching-off
Teach in routine	According to customer specification
Freefield range	Approx. 40 m
Modulation type	OOK
Antenna design	PCB-Loop
Ease of use	Up to 3 individually programmable function keys

Technical changes reserved. Dimensions are not binding. Detailed specifications available on request.
